Similarly, the author of the original book, Naoki Hyakuta, disagreed with this line of criticism, stating in a tweet that "In my book Eternal Zero, I opposed suicide attacks with determination", "I have never ever viewed wars in a positive light", and the theme of the book was "not to allow our memories of war to fade away".

The Eternal Zero - Wikipedia
Eien no Zero is both a compelling story, and an invaluable insight into the Japanese perspective on the War in the Pacific. This book has been a phenomenal bestseller in Japan, with adaptations into a number of different media (including a movie version to come out later this year).

At the 60th Anniversary of the End of World War II, sibling journalists Kentaro and Keiko are given an opportunity to research the death of their estranged grandfather. Apparently he may have been a Kamikaze bomber, but there is much more to his story than just his death. He was a plane builder who did not create his machines for war but developed this engine for high altitude and long distance as a tribute to the sky and to ingenuity. His story is one of family, love and pacifism in the skies above the Pacific.

Excavating the power of memory offers a succinct examination of how memory is constructed, embedded and disseminated in contemporary Japanese society. The unique range and perspective of this collection will provide an understanding not found elsewhere. It starts with a lucid introduction of how memory plays a political and wider social role in Japan. Four case studies follow. The first takes up the divergence in memory at the national and subnational levels by analyzing the memory of the battle of Okinawa and US military accidents in Okinawa prefecture, illuminating how memory in the prefecture embeds Okinawans as victims of mainland Japan and of the United States. The second explores whether Japan's membership of the International Criminal Court represents a shift in the Japanese government's negative remembrance of the International Military Tribunal for the Far East, demonstrating how both courts are largely portrayed as being disconnected in political debates. The third offers an analysis of the surviving letters of the Kamikaze pilots in order to interrogate and compare their presumed identity in the dominant collective memory and their own self-identities. The fourth untangles how the 'memory of winds' in Japanese fishing communities remains an expression of social thought that presides over the 'transmission of meaning' about fishermen's geographical surroundings. This book was previously published as a special issue of the Japan Forum.

Two hot guys. One desert island. Troy Tanner walks out on his boy band's world tour rather than watching his little brother snort his life away. Screw it. He'll take a private jet home and figure out his life away from the spotlight. But Troy doesn't make it home. The plane crashes on a jungle island in the South Pacific. Forget dodging the paparazzi—now Troy's desperate for food and water. The turquoise ocean and white sand beach looks like paradise, but danger lurks everywhere. Thank God the pilot survived too. At least Troy's not alone. He has Brian. Brian's smart and brave and strong. He doesn't care that Troy's famous. Brian's real. As days turn into weeks with no sign of rescue, Troy and Brian rely on each other. They make each other laugh despite being stranded. They go from strangers to friends. What happens when they want more? Although he and Brian both identify as straight, their growing desire burns hotter than the tropical sun. If they explore their sexuality a thousand miles from anything or anyone, can their newfound love survive in the real world if they're finally rescued? This slow-burn LGBT romance from Keira Andrews features bisexual awakening, scorching m/m first times, an age gap, and of course a happy ending.

Japanese 'new religions' (shinsh?ky?) have used various media forms for training, communicating with members, presenting their messages, reinforcing or protecting the image of the leader, and, potentially, attracting converts. In this book the complex and dual relationship between media and new religions is investigated by looking at the tensions groups face between the need for visibility and the risks of facing attacks and criticism through media. Indeed media and new technologies have been extensively used by religious groups not only to spread their messages and to try to reach a wider audience, but also to promote themselves as a highly modern and up-to-date form of religion appropriate for a modern technological age. In 1980s and early 1990s some movements, such as Agonsh? , K?fuku no Kagaku, and Aum Shinriky? came into prominence especially via the use of media (initially publications, but also ritual broadcasts, advertising campaigns, and public media events). This created new modes of ritual engagement and new ways of interactions between leaders and members. The aim of this book is to develop and illustrate particular key issues in the wider new religions and media nexus by using specific movements as examples. In particular, the analysis of the interaction between media and new religions will focus primarily on three case studies predominantly during the first period of development of the groups.

Contents tourism is tourism induced by the contents (narratives, characters, locations and other creative elements) of films, novels, games, manga, anime, television dramas and other forms of popular culture. Amidst the boom in global interest in Japanese popular culture, the utilization of popular culture to induce tourism domestically and internationally has been central to the "Cool Japan" strategy and, since 2005, government policy for local community revitalization. This book presents four main case studies of contents tourism: the phenomenon of "anime pilgrimage" to sites appearing in animated film; the travel behaviours and "pop-spiritualism" of female history fans to heritage sites; the collaboration between local community, fans and copyright holders that underpinned an anime-induced tourism boom in a small town north of Tokyo; and the large-scale economic impacts of tourism induced by NHK's annual samurai period drama (Taiga Drama). It is the first major collection of articles published in English about media-induced tourism in Japan using the "contents tourism" approach. This book will be of particular interest to students and researchers of media and tourism studies in Asia. This book was previously published as a special issue of Japan Forum.

Japan was shaken by the 'double disaster' of earthquake and sarin gas attack in 1995, and in 2011 it was hit once again by the 'triple disaster' of earthquake, tsunami, and nuclear meltdown. This international, multi-disciplinary group of scholars examines the state and societal responses to the disasters and social crisis.

A Chicago Style Manual-type guide for anyone working on English-language publications about Japan. Primarily for nonspecialists, it also contains advice and lists of resources for translators and researchers.

A killer is on the loose, blurring the line between fact and fiction. His prey - the writers of crime novels who have turned psychological profilers into the heroes of the nineties. But this killer is like no other. His bloodlust shatters all the conventional wisdom surrounding the motives and mechanics of how serial killers operate. And for one woman, the desperate hunt to uncover his identity becomes a matter of life and death. Professor Fiona Cameron is an academic psychologist who uses computer technology to help police forces track serial offenders. She used to help the Met, but vowed never to work for them again when they went against her advice and subsequently botched an investigation. Still smarting from the experience, she's working a case in Toledo when her lover, thriller writer Kit Martin, tells her a fellow crime novelist has been murdered. It's not her case, but Fiona can't help taking an interest. When the killer strikes again Fiona finds herself caught in a race against time - not only to save a life but also to find redemption, both personal and professional. Rich in atmosphere, Val McDermid's Killing the Shadows uses the backdrops of city and country to create an air of threatening menace, culminating in a tense confrontation between hunter and hunted, a confrontation that can have only one outcome.

From computer games to figurines and maid cafes, men called "otaku" develop intense fan relationships with "cute girl" characters from manga, anime, and related media and material in contemporary Japan. While much of the Japanese public considers the forms of character love associated with "otaku" to be weird and perverse, the Japanese government has endeavored to incorporate "otaku" culture into its branding of "Cool Japan." In Otaku and the Struggle for Imagination in Japan, Patrick W. Galbraith explores the conflicting meanings of "otaku" culture and its significance to Japanese popular culture, masculinity, and the nation. Tracing the history of "otaku" and "cute girl" characters from their origins in the 1970s to his recent fieldwork in Akihabara, Tokyo ("the Holy Land of Otaku"), Galbraith contends that the discourse surrounding "otaku" reveals tensions around contested notions of gender, sexuality, and ways of imagining the nation that extend far beyond Japan. At the same time, in their relationships with characters and one another, "otaku" are imagining and creating alternative social worlds.
