The Raven: six men and an elf, sword for hire in the wars that have torn apart Balaia. For years their loyalty has been only to themselves and their code. But, that time is over. The Wytch Lords have escaped and The Raven find themselves fighting for the Dark College of magic, searching for the location of Dawnthief. It is a spell created to end the world, and it must be cast if any of them are to survive. Dawnthief is a fast paced epic about a band of all-too-human heroes. From the Trade Paperback edition.

Comprehensive in scope and contemporary in coverage, this text explores modern digital and data communications systems, microwave radio communications systems, satellite communications systems, and optical fiber communications systems.

Each year a billion dollars is spent on church buildings in the United States. Yet there is no authoritative book available to guide building committees, ministers, and others responsible for new churches in the theological implications of their work. Dr. White explores the theological and historical considerations relevant to building for Protestant worship. Surprisingly, these are often ignored by building committees, usually with disastrous results. His approach is highly original, especially in his theological treatment of worship; yet his book is also a operative in the largest sense, in that it relates theology to practice. Professor White begins with a critical analysis of contemporary concepts of Protestant worship and then defines the liturgical factors in church design. Following this, there are four chapters giving an historical account of various experiments from the third century to the present. This section indicates the tremendous variety of possibilities open to the church builder, many of which have been ignored too long. A final chapter deals with emotive factors - all vitally relevant to the architect: choir, liturgical art, and style. The opportunity to design a new

church building occurs only once or twice in each generation of church members. It is all the more important that it be done carefully since the building will continue to affect the life of the congregation for many years. Until fundamental questions as to what the Church is and what the Church does in worship are raised, a congregation is not prepared to build. This book will help churches find the answers. The 155-item bibliography should be of value to many since a recent extensive bibliography on Protestant church architecture does not exist. This book also contains 60 diagrams of experiments in plan garnered from nearly 2000 years of history.

This is a comprehensive survey of European history from the coup d'etat of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo, which led to the First World War. It concentrates on the twin themes of revolution and nationalism, which often combined in the early part of the century but which increasingly became rival creeds. Going beyond traditional political and diplomatic history, the book incorporates the results of recent research on population movements, the expansion of markets, the accumulation of capital, social mobility, education, changing patterns of leisure, religious practices, and intellectual and artistic developments. The work falls into three chronological sections. The first, starting in 1800 (rather than the more usual 1815) follows the build-up of the revolutionary currents which were eventually going to erupt in the 'Year of Revolutions' 1848. The second, from 1850 to 1880, deals with the golden age of capitalism, the successful culmination of struggles for national unification, and the threat of anarchism. The concluding chapters look at the social and political stresses caused by socialism and national minorities, at new attempts by government to order society, imperial rivalry, and the descent into a war which was to mark the end of nineteenth-century Europe. For this third edition, Dr Gildea has substantially revised the text and maps, and completely updated the bibliography. Newly-

Bill Gates is not only the world's most successful capitalist; he's the world's biggest philanthropist. Gates has approached philanthropy the same way he revolutionized computer software: with a fierce ambition to change the rules of the game. That's why at last year's annual meeting of the World Economic Forum in Davos, Switzerland, Gates advocated a 'creative capitalism', in which big corporations should integrate doing good into their way of doing business. This controversial new idea is discussed and debated by the more than 40 contributors to this book, among them three Nobel laureates and two former U.S. cabinet secretaries. Edited by author and columnist Michael Kinsley, *Creative Capitalism* brings together some of the world's best minds to engage Gates's challenge. From Warren Buffet, who seconds Gates's analysis, to Lawrence Summers, who worries about the consequences of multiple corporate objectives, the essays cover a broad spectrum of opinion. *Creative Capitalism* is not just a book for philanthropists. It's a book that challenges the conventional wisdom about our economic system, a roadmap for the new global economy that is emerging as capitalism adapts itself once again to a changing world.

In the second book in Jen Calonita's six-book *Secrets of My Hollywood Life* series, it seems like this is going to be the summer of dreams come true for Hollywood celebrity princess Kaitlin Burke. The media loves her (again), super-cute and funny Austin Meyers is finally her boyfriend, and she's starring in a blockbuster movie by her all-time favorite director Hutch Adams. What could be sweeter? But life on set is not nearly as perfect as the designer makeup and couture costumes. And with a slimy ex-boyfriend and a scheming new publicist on the scene, it's about to get a whole lot messier....

*Visions of Culture: A Reader, Second Edition*, is an anthology of articles about anthropological theorists.
