This is a 400 page 6 X 9 inch Black and White paperback version of Captain Mike Ray's "Unofficial Airbus 320 Series manual". This document is presented as a less expensive version of that document. And while it incorporates all of the features and information, it lacks the beautiful color and lay-flat characteristics of the original document.

In this manual, you as a pilot, will learn about main flight concepts and how the A320 works during normal and abnormal operations. This is not a technical manual about systems, it's a manual about of flight philosophy. This manual is based on the original Airbus manual called "The Flight Crew Training Manual" which is published as a supplement to the Flight Crew Operating Manual (FCOM) and is designed to provide pilots with practical information on how to operate the Airbus aircraft. It should be read just like a supplement and not for real flight. In this case refer to the original FCOM from Airbus. Let's start to fly the amazing A320 with our collection of books and remember, it's not a technical manual so enjoy it!

If you are either an Airbus-driver or a serious flight simmer, this collection of information is something that should pique your interest. Learning to understand and operate one of the world's most complex machines is a tall request from a simple book like this ... and Captain Mike Ray is up to the task. His treatment of the airplane systems and operational techniques is written in an interesting and entertaining way ... and makes learning the difficult and complex ... well, almost easy. This over 400 page document is lavishly illustrated in full color to take advantage of the increased learning potential in the use of color. There can be no doubt that the Airbus A320 is a color driven systems airplane and this book attempts to take full advantage of the use of color in describing and illustrating the operations of the airplane systems and controls. Whatever price penalty is incurred in the purchasing of this color volume is well worth the investment in increased learning potential.

Captain John A. Moktadier graduated and received his Bachelor's Degree from Embry-Riddle Aeronautical University in Daytona Beach, Florida. He has been flying for the past 35 years and currently holds both a Gold Seal Flight Instructor and Advanced Ground Instructor licenses from the FAA. Capt. Moktadier has four type ratings which include: Airbus 330, Airbus 320, Boeing 747 and Boeing 727. He has logged over 24,000 hours flight time with the majority of his hours in jet transport and wide body aircraft. He has flown around the world. Captain Moktadier served as a Boeing 727 Check Airman (TRE) and conducted rating rides, proficiency checks, instructions and simulator checks and line checks for over 10 years with a commercial airline in the United States. He has trained hundreds of pilots with no failures and well above average results. The pilots he has trained have lots of respect for Capt. Moktadier's knowledge and his training style made them feel relaxed during the entire simulator session maximizing their learning due to his teaching ability, honesty and integrity. They have all commented that he is a true professional instructor and TRE. This is his second book that he has published. The first one was Boeing 727 Flight Master which received many outstanding and excellent reviews and positive feedback from the professionals in the airline industry who read the book and it soon became one of the best training books on a Boeing 727.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.
