The CF6-50 series are high-bypass turbofan engines rated between 51,000 and 54,000 lb (227.41 to 240.79 kN, or '25 tons') of thrust.

The CF6-50 was developed into the LM5000 industrial turboshaft engines. It was launched in 1969 to power the long range

McDonnell Douglas DC-10-30, and was derived from the earlier CF6-6.

(64 FR 57606). That action proposed to require initial and repetitive inspections for cracks in the stage 14 high pressure compressor (HPC) disk lock slots, and removal from service of certain disks, at the first piece-part level or ...

## **Airworthiness Directives; General Electric Company CF6-45 ...**

The FAA is adopting a new airworthiness directive (AD) for General Electric Company (GE) CF6-45 and CF6-50 series turbofan engines with certain low-pressure turbine (LPT) stage 3 disks installed. This AD requires fluorescent penetrant inspection (FPI) of the LPT stage 3 disk under certain conditions and removal of the disk from service before further flight if found cracked.

## **Airworthiness Directives; General Electric Company CF6-45 ...**

On March 27, 2006, we issued a proposal to amend part 39 of the Code of Federal Regulations (14 CFR part 39) to add an AD, applicable to GE CF6-45 and -50 series turbofan engines. The proposed AD published as an NPRM in the Federal Register on March 31, 2006 (71 FR 16246). That NPRM proposed to require reworking the forward and aft centerbodies to add doublers, larger nuts and bolts, and higher strength corrosion resistant nut plates.

The FAA proposes to supersede an existing airworthiness directive (AD) for General Electric (GE) CF6-45/-50 series and CF6-80A series turbofan engines with certain part number (P/N) side links of the five-link forward mount assembly installed. That AD currently requires an initial and repetitive visual inspection of the side links for cracks, and stripping and reapplying the Sermetel W coating on the side link at every exposure of the side link.
