The difference between manual and automatic cars is that manual cars use manual transmission whereas automatic cars use automatic transmission. In a manual car, the driver is

Greater control:
A manual gearbox

gives you more control over the car as you alone choose which gear to use. This can be particularly beneficial in wintry conditions. More speed: Some automatics can be slow and cumbersome,

Automatic vs manual cars: which is better? | RAC Drive

Manuals are more efficient than older automatics

as they have more gears and are lighter. Some learners find the clutch and gear stick difficult to master. Electric cars don't have a gearbox, so automatics might be the norm in the future. Manuals are less
