Home | Eat 2 Run | Natural Nutrition for Runners

The best way to take in additional calories is by having small bites of an energy bar or energy chews every 20-30 minutes. Keep it as simple as possible and practise your nutrition and hydration strategy as often as you can on your long runs. Eat or drink more if you feel you need it, and always listen to your body.

Eat, Drink, Run. by Bryony Gordon | Waterstones

Drink lots of water during the week before the race. This optimizes your hydration before you hit the start line. Eat a diet rich in complex carbohydrates, such as breads, rice, pasta and starchy vegetables. This helps maximize your glycogen (energy) stores.

How to Prepare for a Marathon & What to Eat

Drink about 8 ounces of your energy drink. Eat something that is mostly carbohydrate rich but easily digestible (such as whole grain crackers). Eat some complex carbohydrates that provide the steady release energy (such as oatmeal) but also include a few simple carbs that give you a mix of quick release energy to get you started (maybe some pretzels) and drink at least 8 ounces of water.

Food for Runners: What to Eat Before Your Long Run

Drink approximately 20 ounces an hour before you run so the water gets absorbed in muscle. Sports drinks are generally overkill unless you plan to exercise for more than 60 minutes or in hot...
