The law of effect principle developed by Edward Thorndike suggested that: "responses that produce a satisfying effect in a particular situation become more likely to occur again in that situation, and responses that produce a discomforting effect become less likely to occur again in that situation (Gray, 2011, p. 108-109)."

What You Need In an Electronics Lab? David L. Jones has created a very good video in which he explains things you need in an electronics lab. In 30 minutes he lists everything that you need in a killer electronics lab (David calls it a "decent" lab!). In case you are too lazy to go through the video, I have summarized his list below.

How to set up an electronics lab/workshop at home

Overall, 164 articles with 277 experiments were included. MS yielded moderate effects ($r = .35$) on a range of worldview- and self-esteem-related dependent variables (DVs), with effects increased for experiments using (a) American participants, (b) college students, (c) a longer delay between MS and the DV, and (d) people-related attitudes as ...
