Foundation Maths has been written for students taking higher and further education courses who have not specialised in mathematics on post-16 qualifications and need to use mathematical tools in their courses. It is ideally suited to those studying marketing, business studies, management, science, engineering, social science, geography, combined studies and design. It will be useful for those who lack confidence and who need careful, steady guidance in mathematical methods. For those whose mathematical expertise is already established, the book will be a helpful revision and reference guide. The style of the book also makes it suitable for self-study and distance learning. Features of the book Mathematical processes are described in everyday language mathematical ideas are usually developed by example rather than formal proof, thereby encouraging students' learning. Key points highlight important results that need to be referred to easily or remembered. Worked examples are included throughout the book to reinforce learning. Self-assessment questions are provided at the END of most sections to test understanding of important parts of the section. Answers are given at the back of the book. Exercises provide a key opportunity to develop competence and understanding through practice. Answers are given at the back of the book. Test and assignment exercises (with answers provided in a separate Lecturers' Manual on the website) allow lecturers and tutors to set regular assignments or tests throughout the course. New to this EDITION Six new chapters: Chapter 4 Sets, Chapter 5 Number Bases, Chapter 9 Elementary Logic, Chapter 31 Integration by Parts, Chapter 36 Correlation and Chapter 37 Regression. Extra END-of-chapter questions for students (with answers) on the website at www.pearsoned.co.uk/croft . PowerPoint slides for lecturers on the website featuring Key Points from the book with their related Worked Examples. Anthony Croft has taught mathematics in further and higher education institutions for twenty four years. He is currently Director of the Mathematics Education Centre at Loughborough university, which has been designated a Centre for Excellence in Teaching and Learning by the Higher Education Funding Council for England. He teaches mathematics and engineering undergraduates, and has championed mathematics support for students who find the transition from school to university difficult and for students with learning difficulties. He has AUTHOREd many very successful mathematics textbooks including several for engineering students. Robert Davison has twenty five years experience teaching mathematics in both further and higher education. He is currently Head of Quality in the Faculty of Computing Sciences and Engineering at De Montfort University, where he also teaches mathematics. He has AUTHOREd many very successful mathematics textbooks including several for engineering students.

Were you looking for the book with access to MyMathLab? This product is the book alone, and does NOT come with access to MyMathLab. Buy Foundation Maths with MyMathLab access card 5e (ISBN 9780273730767) if you need access to the MyLab as well, and save money on this brilliant resource. Foundation Maths has been written for students taking higher and further education courses who have not specialised in mathematics on post-16 qualifications and need to use mathematical tools in their courses. It is ideally suited to those studying marketing, business studies, management, science, engineering, social science, geography, combined studies and design. It will be useful for those who lack confidence and who need careful, steady guidance in mathematical methods. For those whose mathematical expertise is already established, the book will be a helpful revision and reference guide. The style of the book also makes it suitable for self-study and distance learning. Need extra support? This product is the book alone, and does NOT come with access to MyMathLab. This title can be supported by MyMathLab, an online homework and tutorial system which can be fully integrated into an instructor's course. You can benefit from MyMathLab at a reduced price by purchasing a pack containing a copy of the book and an access card for MyMathLab: Foundation Maths with MyMathLab access card 5e (ISBN 9780273730767). Alternatively, buy access to MyMathLab and the eText - an online version of the book - online at www.mymathlab.com. For educator access, contact your Pearson Account Manager. Were you looking for the book with access to MyMathLab Global? This product is the book alone, and does NOT come with access to MyMathLab Global. Buy Foundation Maths, 6th edition with MyMathLab Global access card (ISBN 9781292095257) if you need access to MyMathLab Global as well, and save money on this resource. You will also need a course ID from your instructor to access MyLab. Foundation Maths has been written for students taking higher and further education courses who have not specialised in mathematics on post-16 qualifications and need to use mathematical tools in their courses. It is ideally suited to those studying marketing, business studies, management, science, engineering, social science, geography, combined studies and design. It will be useful for those who lack confidence and who need careful, steady guidance in mathematical methods. For those whose mathematical expertise is already established, the book will be a helpful revision and reference guide. The style of the book also makes it suitable for self-study and distance learning.

Revised edition of: Engineering mathematics: a foundation for electronic, electrical, communications, and systems engineers / Anthony Croft, Robert Davison, Martin Hargreaves. 3rd editon. 2001.

Deepen and broaden subject knowledge to set yourself up for future success Foundation Maths 7th Edition by Croft and Davison has been written for students taking higher and further education courses who may not have specialised in mathematics on post-16 qualifications, and who require a working knowledge of mathematical and statistical tools. By providing careful and steady guidance in mathematical methods along with a wealth of practice exercises to improve your maths skills, Foundation Maths imparts confidence in its readers. For students with established mathematical expertise, this book will be an ideal revision and reference guide. The style of the book also makes it suitable for self-study and distance learning with self-assessment questions and worked examples throughout. Foundation Maths is ideally suited for students studying marketing, business studies, management, science, engineering, social science, geography, combined studies and design. Features: Mathematical processes described in everyday language. Key points highlighting important results for easy reference Worked examples included throughout the book to reinforce learning. Self-assessment questions to test understanding of important concepts, with answers provided at the back of the book. Demanding Challenge Exercises included at the end of chapters stretch the keenest of students Test and assignment exercises with answers provided in a lecturer''s Solutions Manual available for download at go.pearson.com/uk/he/resources, allow lecturers to set regular work throughout the course A companion website containing a student support pack and video tutorials, as well as PowerPoint slides for lecturers, can be found at go.pearson.com/uk/he/resources New to this edition: A new section explains the importance of developing a thorough mathematical foundation in order to take advantage of and exploit the full capability of mathematical and statistical technology used in higher education and in the workplace Extensive sections throughout the book illustrate how readily-available computer software and apps can be used to perform mathematical and statistical calculations, particularly those involving algebra, calculus, graph plotting and data analysis There are revised, enhanced sections on histograms and factorisation of quadratic expressions The new edition is fully integrated with MyLab Math, a powerful online homework, tutorial and self-study system that contains over 1400 exercises that can be assigned or used for student practice, tests and homework Anthony Croft has taught mathematics in further and higher education institutions for over thirty years. During this time he has championed the development of mathematics support for the many students who find the transition from school to university mathematics particularly difficult. In 2008 he was awarded a National Teaching Fellowship in recognition of his work in this field. He has authored many successful mathematics textbooks, including several for engineering students. He was jointly awarded the IMA Gold Medal 2016 for his outstanding contribution to mathematics education. Robert Davison has thirty years'' experience teaching mathematics in both further and higher education. He has authored many successful mathematics textbooks, including several for engineering students. Note: You are purchasing a standalone product; MyLab Math does not come packaged with this content. Students, if interested in purchasing this title with MyLab Math, ask your instructor to confirm the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyLab Math search for: 9781292289762 / 1292289767 Foundation Maths 7th Edition plus MyLab Math with eText -- Access Card Package. Package consists of: 9781292289687 / 1292289686 Foundation Maths 7th Edition MyLab Math with Pearson eText -- ValuePack Access Card -- for Foundation Maths 7th Edition Pearson, the world''s learning company.

This foundation text is aimed at the less well prepared student at pre-degree level, and provides well-paced, mathematically sound and motivating coverage. The text concentrates on applicable maths, including simple engineering examples across all engineering disciplines, highlighting the relevance of the mathematical techniques presented. Clear explanations of the concepts behind each technique are provided.

An accessible, step-by-step approach to teaching mathematics with today's engineering student in mind. The content is divided into manageable pieces of work ('blocks') focusing on one specific technique and the explanations are gradually developed through fully and part-worked examples. Highlighted key points and use of icons throughout the book aid understanding of the mathematical concepts being presented.

This package includes MyLab Croft, Foundation Maths, 7e. Students, if MyLab Croft, Foundation Maths, 7e is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN and course ID. MyLab Croft, Foundation Maths, 7e should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information.

Were you looking for the book with access to MyLabMath Global? This product is the book alone, and does NOT come with access to MyLabMath Global. Buy Mathematics for Engineers, 5e by Croft with MyLabMaths Global access card 5e (ISBN 9781292267685) if you need access to the MyLab as well, and save money on this brilliant resource. Understanding key mathematical concepts and applying them successfully to solve problems are vital skills that all engineering students must acquire. Mathematics for Engineers teaches, develops and nurtures those skills. Practical, informal and accessible, it begins with the foundations and gradually builds upon this knowledge as it introduces more complex concepts to cover all requirements for a first year engineering maths course, together with introductory material for even more advanced topics. Need extra support? This product is the book alone, and does NOT come with access to MyMathLab Global. This title can be supported by MyMathLab Global, an online homework and tutorial system which can be used by students for self-directed study or fully integrated into an instructor's course. You can benefit from MyMathLab Global at a reduced price by purchasing a pack containing a copy of the book and an access card for MyMathLab Global: Mathematics for Engineers with MyMathLab Global access card 5e (ISBN 9781292267685). For educator access, contact your Pearson Account Manager. To find out who your account manager is, visit www.pearsoned.co.uk/replicator

This book provides a good introduction to the classical elementary number theory and the modern algorithmic number theory, and their applications in computing and information technology, including computer systems design, cryptography and network security. In this second edition proofs of many theorems have been provided, further additions and corrections were made.
