practitioners (local government and national agencies) and researchers within crisis and emergency response, information systems (IS), and public administration research disciplines and domains (e.g. co-production). The description of the transformation toward ICT-enabled coproduction in crisis

Read PDF Ict Workshop

and emergency response is a result in its own right.

Here, the citizen volunteers become involved in the actual delivery of the response, despite non-specific competence and non-organizational affiliation.

In relation to the transformation toward co-production, the thesis concludes that digitalization facilitates

Read PDF Ict Workshop

end-user involvement in the ICT development process and increases their influence. If open systems as mobile technologies are used, end-users can adapt the technology on their own and add technologies, without the support of the formal developer or local government. The thesis also identifies opportunities and
