LaTeX is a document preparation system used for the communication and publication of scientific documents. LaTeX is free software and is distributed under the LaTeX Project Public License.

## LaTeX Documentation

This document is an unofficial reference manual for LATEX, a document preparation system, version of October 2018. This manual was

# Online Library Latex Manual

originally translated from LATEX.HLP v1.0a in the VMS Help Library. The pre-translation version was written by George D. Greenwade of Sam Houston State University. The L ATEX 2.09 version was written by Stephen Gilmore. The LTEX2e version

any change in the output. Finally, the input `\LaTeX` comes out in the output as LATEX. Thus our source is a mixture of text to be typeset and a couple of LATEX commands `\emph` and `\LaTeX`. The first command changes the input text in a certain way and the second one generates new text. Now call up the file again and add one more sentence given below.

## **LATEX Tutorials**

LATEX (pronounced lay-tek) is a document preparation system for producing professional-looking documents, it is not a word processor. It is particularly suited to producing long, structured documents, and is very good at type- setting equations. It is available as free software for most operating systems.

## **PGF and TikZ, Manual for Version 3.0.1 – CVS**

LaTeX has the convention that some commands have a `*` form that is related to the form without a `*`, such as `\chapter` and `\chapter*`. The exact difference in behavior varies from command to command. This manual describes all accepted options and `*-forms` for the commands it covers (barring unintentional omissions, a.k.a. bugs).
