It replaces all previous editions of the Malawi Antiretroviral therapy (ART) and Prevention of Mother to Child Transmission (PMTCT) guidelines.

Malawi Guidelines for HIV Clinical Management in Children-

- Malawi created and successfully scaled up B+, a highly effective PMTCT program
- Malawi has sustained B+ successes with excellent PMTCT and maternal ART coverage, efforts to retain women and infants, and decreasing vertical transmission moving close to elimination
- Malawi has also moved beyond B+, innovating and addressing other gaps in PMTCT such as syphilis and EID testing coverage with interventions such as its HDA program.

Updates on PMTCT from Malawi, the country where Option B+

Despite coverage and benefits associated with the prevention of mothers to child transmission (PMTCT) services, mothers' adherence to option B plus is still a challenge. Though few primary studies are available on the magnitude of adherence to option B plus and factors associated in Eastern African countries, they do not provide strong evidence in helping policymakers to address suboptimal ...
