This book provides a comprehensive and accessible account of the new theories of discourse developed by Ernesto Laclau and Chantal Mouffe, while in particular drawing on central insights provided by Slavoj Žizek. The book accounts for intellectual development of the discourse theory of Laclau and Mouffe from a Gramsci-inspired critique of structural Marxism over a neo-Gramscian theory of discourse to a new type of postmodern theorizing of great relevance for social, cultural and political theory. The central concepts of discourse, hegemony and social antagonism are carefully explained and discussed and the theoretical framework is applied both on a variety of theoretical problems and in a sample of empirical studies. The book concludes with a discussion of the implications of discourse theory for our political understanding of democracy, citizenship and ethics. New Theories of Discourse is written out of the basic conviction that postmodernity provides a great challenge to social, cultural and political theory and makes thinkable a whole range of new political projects of which the development of a radical plural democracy is one of the most promising and exciting.

A systematic introduction to discourse analysis as a body of theories and methods for social research. Introduces three approaches and explains the distinctive philosophical premises and theoretical perspectives of each approach.

In this hugely influential book, Laclau and Mouffe examine the workings of hegemony and contemporary social struggles, and their significance for democratic theory. With the emergence of new social and political identities, and the frequent attacks on Left theory for its essentialist underpinnings, Hegemony and Socialist Strategy remains as relevant as ever, positing a much-needed antidote against —Third Way— attempts to overcome the antagonism between Left and Right.

A systematic examination of the relationship between post-Marxist discourse theory and media studies. This volume interrogates discourse theory — as read via the work of Ernesto Laclau and Chantal Mouffe — through an engagement with major approaches to critical media politics and a range of issues in contemporary media politics.

Ernesto Laclau has blazed a unique trail in political theory and philosophy since the early 1970s. In so doing, he has articulated a range of philosophical and theoretical currents into a coherent alternative to mainstream models and practices of conducting social and political science. The editors have focused on work in three key areas: Post-Marxist Political Theory: Discourse, Hegemony, Signification Laclau has developed an original conception of post-Marxist political theory that is grounded on a materialist theory of discourse. The latter is constructed from a range of theoretical and philosophical sources, including poststructuralism, psychoanalysis, linguistic theory and post-analytical philosophy. The centerpiece of this approach is the category of hegemony, which develops Antonio Gramsci's seminal contribution to Marxist theory, and is in turn connected to a web of related concepts, including articulation, dislocation, the logics of equivalence and difference, political identification, myth and social imaginary. These ideas have informed a number of empirical and theoretical studies associated with the Essex School of Discourse Theory. Analyzing Populism A central concern of Laclau's writings has been the question of populism, both in Latin America where he began his interrogation of the phenomenon (especially the experience of Peronism), and then in his engagement with the "new social movements" and socialist strategy more generally. The concept of populism becomes a general way of exploring the "primacy of politics" in society. Critical Engagements Laclau is first and foremost an engaged intellectual who has consistently sought to theorize contemporary events and reality, and to debate with the leading intellectual figures of the day, with respect to questions of political principle and strategy. His recent debates with Judith Butler and Slavoj Žižek in Contingency, Hegemony, Universality: Contemporary Dialogues on the Left, published in 2011 (London: Verso), exemplify this critical ethos. He continues to elaborate his approach by challenging and articulating related approaches, and by situating his work in connection to the democratic Left.

This book presents an alternative theoretical approach to the study of the transformation of the modern welfare state. It draws upon the undogmatic Marxism of Gramsci in order to deconstruct the Marxist tradition and develop a general theory of capitalist regulation which emphasizes the primacy of the political. In so doing, it seeks to integrate French regulation theory and British state theory within the broader framework of discourse analysis. This theoretical framework is applied in an empirical analysis of the Danish variant of the Scandinavian welfare state model. The book is written for advanced undergraduates, postgraduates and professionals within the field of political theory, institutional economics and sociology.

Examining the theories of Foucault, Koselleck, Laclau and Luhmann, the book discusses and combines these theories to suggest new analytical strategies for understanding society.

The concept of discourse is used in a variety of disciplines in the humanities and social sciences. By drawing upon existing empirical accounts, this book shows how this conception of discourse theory is used to analyse central issues in social science research.
