Nonverbal communication can be more powerful—and even more influential—than what we say with words, and can have a tremendous impact on our success as hearing health care professionals. Experts in interpersonal communication have estimated that nonverbal communication constitutes approximately 70 percent of what is involved in communication.

Article excerpt.

Introduction. Communication is a process in which people verbally or non-verbally share information and ideas. Non-verbal communication can be best defined as a silent form of communicating with a person or party without using any form of speech to grab the attention of audience or to exploit a message.

Eye contact is a strong nonverbal cue that serves four functions in communication (Hickson, 2010). First, eye contact regulates the flow of communication by signaling the beginning and end of conversation. Second, eye contact facilitates and monitors feedback, because it reflects interest and attention. Third, eye contact conveys emotion.

In fact, researchers discussed nonverbal communication in the analysis section in less than 10% (i.e., $6/72 = 8.3\%$) of articles in which verbal data were collected.

Nonverbal communication data were discussed approximately equally in the data collection (i.e., $34/72 = 47.2\%$) and results/discussion (i.e., $32/72 = 44.4\%$) sections of the articles.
