Power Pivot, Power BI Designer, and SSAS Tabular all store and compresses data in a "column stripe" format, as pictured here. Each column is less compressed than the one before\* it. (\* The compression order of the columns is auto-decided by the engine at import time, and not something we can see or control.)

*Power Pivot and Power BI: 1*

Power BI provides an additional option for doing this type of work. Let's say you work at a company that has an older version of Excel that doesn't support Power Query or Power Pivot. You can download Power BI (free at [powerbi.microsoft.com](http://powerbi.microsoft.com)) and use it instead of Excel. Power Query and Power Pivot are critical skills for Excel users to learn.
