~~Project Finance in Theory and Practice—Designing—~~

Project finance is the funding (financing) of long-term infrastructure, industrial projects, and public services using a non-recourse or limited recourse financial structure. The debt and equity...

~~Project Finance Definition—Investopedia~~

In a sense, I would say the term is indicative because project finance is the financing of one specific project namely an infrastructure. If you want, there is a clear correspondence between one project and one entity that is created with the sole purpose to design, to build, and to manage that specific infrastructure. And that company goes under the name of Special Purpose Vehicle. You can understand that there is a basic difference between project finance and the traditional corporate finance.

~~1.2—What Is Project Finance?—Project Finance and the—~~

Project finance is a method of raising long-term debt financing for major projects through [financial engineering,] based on lending against the cash flow generated by the project alone; it depends on a detailed evaluation of a project's construction, operating and revenue risks, and their allocation between investors, lenders, and other parties through contractual and other arrangements.
