"In contemplating a revision of our *Psychology: a Factual Textbook*, we turned for criticisms and suggestions to the psychologists who were known to be using the book. Very soon it became evident, with their replies in hand for analysis, that something more than a revision would be necessary to satisfy the needs of many

teachers. Our aim in this new text has been to respond to the temper of the times without losing the authority that comes with multiple authorship by experts, and equally without diminishing, we hope, the seriousness of the scientific approach to the problems of psychology. This new book is so much more than a revision of the old that we have given it a new title. In it we have turned the old book hind part to, beginning with the consideration of conduct and ending with the treatment of perception. The book is considerably enlarged, with some new chapters and some new collaborators. As was the case in the first book, these expert authors have formulated in the first instance the content of the chapters, but thereafter we as editors have freely exercised our right to alter their texts in the interests of unity in the whole."

There ' s Mr. Stranger, a greedy, arrogant lawyer that is trying to steal his stepson ' s trust fund. There ' s Bart, his stepson, who is forced to hide out in a monastery to avoid being found by the stepfather ' s private detective. Bart has own personal problem, which is trying to say the difficult four-letter word, “ love. ” There ' s Carol, Bart ' s older sister, who thinks she may have found Mr. Right, but Mr. Right is ready for some loving but not any kind of commitment. There ' s Tony Koole, a gangster, who is hot on the trail of Bart ' s girlfriend, whom he suspects stole his brief case containing cocaine worth two million dollars. There ' s Abbot Aloysius, a kind gentle monk, who doesn ' t have any idea someone may be growing marijuana in the monastery ' s huge forest. Finally after a dozen twists and turns, there is a surprise ending.

The editor's goal in compiling this book was to invite authors to articulate their philosophies, course designs, and teaching techniques for the introductory psychology course. The authors were told to write a chapter for all introductory psychology teachers and to address how the teaching of introductory psychology could be made more rewarding to students and teachers alike. A few authors comment specifically on the writing process of introductory textbooks, and the parallels they have found between the classes they teach and the material they write. It is hoped that these chapters help to shed light on any introductory textbook's underlying purpose, goals, and organization and thus enable teachers to use these essential texts more effectively.

Written by Dr Sandi Mann, Senior Lecturer at the University of Central Lancashire, *Psychology: A Complete Introduction* is designed to give you everything you need to succeed, all in one place. It covers the key areas that students are expected to be confident in, outlining the basics in clear jargon-free English, and then providing added-value features like summaries of key experiments, and even lists of questions you might be asked in your seminar or exam. The book uses a structure that mirrors the way Psychology is taught on many university courses. Chapters include key topics in psychology research; cognitive issues, including language, emotion, memory and perception; individual differences - intelligence, personality and gender; social psychology; mental health and psychological disorders/abnormal

Access Free Rod Plotnik Introduction To Psychology

psychology and the treatment of such; the nervous system; and sleep.

This text encourages students to develop critical-thinking skills while studying psychology's major theories and concepts. James Kalat teaches students to separate what sounds plausible from what can be backed up with scientific evidence and how to tell the difference between sound and flawed evidence. The book's modular organization provides logical breaks within chapters, helping students manage the material for comprehension and providing a more flexible teaching tool for instructors. Kalat's text gets students involved in using the scientific method to question assertions, and in engaging students to want to know more.
