What's a Solution Set? | Virtual Nerd

The solution set for an equation is the set of all numbers that when used in the place of the variable makes the equation a true statement. For example, the equation $x - 6 = 4$ has a solution 10. When $x = 10$, the equation becomes the true statement.

that makes the equation true. The solution set of $2y + 6 = 14$ is $\{4\}$, because $2(4) + 6 = 14$. The solution set of $y^2 + 6 = 5y$ is $\{2, 3\}$ because $2^2 + 6 = 5(2)$ and $3^2 + 6 = 5(3)$. If an equation has no solutions, its solution set is the empty set or null set—a set with no members, denoted \emptyset . For example, the solution set to $x^2 = -9$ is \emptyset ,
