Between the State and the Schoolhouse examines the Common Core State Standards from the initiative's promising beginnings to its disappointing outcomes. Situating the standards in the long history of state and federal efforts to shape education, the book describes a series of critical lessons that highlight the political and structural challenges of large-scale, top-down reforms. Education policy expert Tom Loveless argues that there are too many layers between the state and the classroom for a national standards approach to be effective. Specifically, he emphasizes the significant gap between states' roles in designing education policy and teachers' roles as implementers of policy. In addition, he asserts that top-down policies are unpredictable, subject to political and ideological pressures, and vulnerable to the pendulum effect as new reforms emerge in response to previous ones. One of the most ambitious education reforms of the past century, the Common Core aimed to raise student success, prepare larger numbers of students for both college and careers, and close achievement gaps. Yet, as Loveless documents, a decade later there remains a lack of significant positive impact on student learning. Between the State and the Schoolhouse marks an important contribution to the debate over the standards movement and the role of federal and state governments in education reform.

Every major measure of students' historical understanding since 1917 has demonstrated that students do not retain, understand, or enjoy their school experiences with history. Bruce Lesh believes that this is due to the way we teach history -- lecture and memorization. Over the last fifteen years, Bruce has refined a method of teaching history that mirrors the process used by historians, where students are taught to ask questions of evidence and develop historical explanations. --from publisher description.

Author's abstract: America's teachers face many obstacles but one of the most common is change. The shift to standards-based teaching and the national initiative of common standards have created challenges for school districts as they prepare and support their teachers through these changes. This dissertation provides insight into how one county supported its teachers through the transition to Common Core Georgia Performance Standards. Additionally, the research looks at the perceptions of teachers toward the support given and resources provided by the district and school level administration.
