comprehensive overview of client-centred hypnosis based on the teachings of Charles Tebbetts. Since the person undergoing hypnosis is the one with the power to change him/herself, the hypnotherapist acts as the facilitator, tailoring the hypnosis session to the client. All of the techniques found in The Art of Hypnotherapy, including regression therapy and parts theory, centre on this concept. The Art of Hypnotherapy shows students how all hypnotic techniques revolve around four main therapeutic objectives: Suggestion and Imagery; Discover the Cause; Release; and Subconscious Relearning. New features in this edition include an arrangement of techniques from simple to complex, so that those using hypnosis in a limited way easily learn the applicable technique; a chapter on the common application of

Increasing numbers of therapists around the world are discovering the benefits of parts therapy and its variations to help clients get past personal barriers. Hypnotic Regression Therapy, or HRT, is a type of hypnotherapy in which, following the induction of a good trance state, specialized suggestions are given to guide the client in reviewing and emotionally reframing earlier experiences that have either caused or contributed to the client's current symptoms. HRT is considered one of the most valuable hypnotherapy techniques available today, yet it remains controversial, partly due to inadequate training of psychotherapists and hypnotherapists which has contributed to numerous cases of false memory syndrome.
