NINE-SOLUTION PROBLEM. INTRODUCTION This experiment is an exercise in observation and deduction, both critical skills for productive scientific study. The experiment is divided into two parts. During the first part, which will take at least one lab period, you will be making observations on the results of binary mixing from a total of nine known solutions.

~~NINE SOLUTION PROBLEM — csudh.edu~~

The Nine Solution Problem. This page presents a problem involving the results of the binary mixings of nine solutions. When you present "Present Results", two tables will be generated. In the first, the solutions are identified and the mxing results given. In the second the solutions identities are hidden. Each time you press "Present Results", both tables are reshuffled.

The nine dot problem is a classic lateral thinking exercise that gained widespread popularity in the 1970's and 80's. Participants are presented with a set of dots arranged in a 3x3 grid and challenged to connect all nine dots, without lifting their pencil from the paper, using the fewest possible number of straight lines.

Thinking outside the box is a metaphor that means to think differently, unconventionally, or from a new perspective. This phrase often refers to novel or creative thinking. The term is thought to derive from management consultants in the 1970s and 1980s challenging their clients to solve the "nine dots" puzzle, whose solution requires some lateral thinking. This phrase can also be found commonly in dance, as encouragement to move creatively, beyond simple, geometric box steps and their basic var

A B D C E The 9 dot puzzle is an old puzzle. It appears in Sam Loyd's 1914 puzzle book. It is a very well known problem used by many psychologists to explain the mechanism of 'unblocking' the mind in problem solving activities. It is probable that this brainteaser gave origin to the expression 'thinking outside the box'.
