Is Hypnosis Real? Here's What Science Says | Time

Here ' s a short answer: Research suggests that hypnosis is a powerful tool for self-improvement. And there ' s a fairly simple explanation. Hypnotherapy works by empowering people to change and update subconscious beliefs.

Does Hypnosis Work? Understanding the Science of ...

Hypnosis is a human condition involving focused attention, reduced peripheral awareness, and an enhanced capacity to respond to suggestion.. There are competing theories explaining hypnosis and related phenomena. Altered state theories see hypnosis as an altered state of mind or trance, marked by a level of awareness different from the ordinary state of consciousness.
