(Yamaha Products). Sound reinforcement is the use of audio amplification systems. This book is the first and only book of its kind to cover all aspects of designing and using such systems for public address and musical performance. The book features information on both the audio theory involved and the practical applications of that theory, explaining everything from microphones to loudspeakers. This revised edition features almost 40 new pages and is even easier to follow with the addition of an index and a simplified page and chapter numbering system. New topics covered include: MIDI, Synchronization, and an Appendix on Logarithms. 416 Pages.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This book provides a very detailed description of the function of the Yamaha XS 650 engine, which is based on more than 400 color photos. With the help of this book anyone who has the necessary equipment and basic knowledge should be able to perform maintenance and repair-work. Problems in the electrical system are actually easy to fix. If you don't want to do it by trial and error, this book helps you to understand the electric system of the XS 650. On 35 pages with 38 color photos and graphics you will find an extensive description of the function and how to test all components of the power supply. In addition, a highly simplified wiring harness, which contains all the necessary functions, is described. New spare parts are rarely available. So a whole chapter with 34 color photos is dedicated to the description of typical damages. It will help you to recognize the beginning of wear and to decide whether a part should be replaced or not.

Previously published as one volume under same title.

A proliferation of lawsuits involving sport utility vehicles, defective tires, medical devices and drugs, and asbestos abounds. Public attention to products liability cases is at an all-time high, and awards routinely run into the millions of dollars. When developing a strategy in this high stakes world, attorneys can't afford to have anything other than the best information and insight into this evolving area of law. Lawyers need practical tools to assess a products liability case's potential and build their approach, and Shapo on the Law of Products Liability provides the tools to give you the winning edge. Through a holistic analysis of the law and its principal developments as witnessed in hundreds of cases, this treatise gives litigators a wide variety of perspectives on potential strategies, and the tools to support those strategies with persuasive arguments. This authoritative two-volume work will enable you to: Assess products liability case potential and build sound litigation strategies Dig deep into products liability law to build creative approaches to litigation Craft a winning case and reap the greatest reward for your clients Find the tools and information to support strategies with persuasive arguments Both federal and state courts contribute a rich mix of decisions to products liability law, which covers both consumer products and occupational hazards. This indispensable resource for the products liability practitioner helps you prepare your case. Is the product defective? Who is liable? What is the manufacturer's responsibility? Who can be sued? What kind of awards may be realized? How might this be defended? Shapo on the Law of Products Liability also includes coverage of: Asbestos litigation Chinese drywall Food and drug Medical devices Design/manufacturing defects claims Punitive damages Discovery rule Up to date analysis and commentary History and background on products liability law Damages Advertising material Packaging Marshall S. Shapo, the Frederic P. Vose Professor at Northwestern University School of Law, is a nationally recognized authority on torts and products liability law.
